## RF Microneedling with the **Genius® by Lutronic**

The Genius® by Lutronic is the most intelligent RF Microneedling device available to the medical aesthetics market. By providing “real-time” feedback, the energy delivered is precise for each patient, each treatment and each pass with the micro-needles.

Genius works by delivering radio-frequency energy through gold-plated needles, stimulating your own body’s collagen and elastin production.

### **What Is RF Microneedling:**

Non-surgical, minimally invasive treatment that rejuvenates the appearance of skin. Radio-frequency energy heats the tissue to stimulate sub-dermal collagen production in order to reduce the appearance of fine lines, scarring and loose skin.

Genius RF induces tissue remodeling with the production of new collagen and elastin to provide an alternative to a facelift and other cosmetic surgeries.

### **What Conditions Does This Procedure Treat:**

- Fine lines and wrinkles
- Scar and acne scarring
- Sagging skin
- Overall aging
- Face rejuvenation
- Neck rejuvenation
- **SAFE FOR ALL SKIN TYPES!**
